Download

Note There is no need to ask when a binary package for a given platform will be ready. The packagers are fully aware of every release and they give their best effort to make the binaries available.

Windows

Download phantomjs-2.1.1-windows.zip (17.4 MB) and extract (unzip) the content.

The executable `phantomjs.exe` is ready to use.

Note: For this static build, the binary is self-contained with no external dependency. It will run on a fresh install of Windows Vista or later versions. There is no requirement to install Qt, WebKit, or any other libraries.

Mac OS X

Download phantomjs-2.1.1-macosx.zip (16.4 MB) and extract (unzip) the content.
